

WHERE DID I PUT...MY MEMORY?

Director(s): Josh FREED

Writer(s): Josh FREED

We meet people we know, but can't recall their names. We forget where we put our wallet or our keys. As we live to an older age, memory loss is becoming one of the great health concerns.

Are we all doomed to lose our minds? Or are there ways to keep our memories - and even improve them? Like the competitors of "The World Memory championship": an annual battle of the brains where the world's best memories meet in a gruelling mental Olympics. If you can lose your memory, can you find it?

Our film goes on a light-hearted and enlightening journey into our memories - and how we can improve them.

"... This film is everything a good documentary should be: informative, interesting, fun while involving the viewer. Freed looks at how memory might work, various methods to remember things, and why we forget things. Like all Josh Freed documentary films his sense of humor makes it that much more interesting."

Richard Lanoie in his review for broadcast on CBC. To read the full review please click here.

Categorie(s): Discovery & Nature
